

Vinten Protouch Systems: Introducing the Pozi-Loc Tripod

Unrivalled torsional rigidity transferred from the award winning Vision Range

Picture quality relies as much upon the rigidity of the camera support as it does on the smoothness of the pan & tilt head and accuracy of the counterbalance. Protouch is unique because it includes the Pozi-Loc tripod synonymous with the Vision Range.

Vinten Pozi-Loc was designed to optimise rigidity without compromising operational essentials such as weight, reliability, maintenance and speed of set-up. This special edition Protouch black aluminium Pozi-Loc tripod completes the picture, making Protouch the best value high performance system on the market.

The importance of Vinten design.
