

No Compromise

Vinten

Vision blue

The new **Vision blue** offers true Vinten Vision performance, ensuring for the very first time that operators of the smallest professional cameras can work without creative compromise

“Having tried the **Vision blue** out in the field I’m very impressed. This system has managed the seemingly impossible, top class professional facilities and performance at an affordable price.”

Chris Soucy, NZ

Vision blue

The new **Vision blue** is designed to provide the experienced camera operator with professional support to match the extremely high performance of today's lightweight camcorders and DSLRs equipped for video.

Incorporating the original award winning Vinten Perfect Balance technology, **Vision blue** balances payloads between 2.1 – 5 kg / 4.6 – 11

lbs with a low centre of gravity of around 55 mm. This ensures that it can genuinely balance the smaller, lightly accessorised cameras that are so common today.

In addition the head features genuine Vision LF drag technology for silky smooth movement and precise framing, and a high contrast blue LED illuminated levelling bubble for quick, accurate set up in all lighting situations.
