

3D Wedge Adapter

Vinten is 3D Ready!

The Vinten 3D wedge adaptor for EFP and ENG systems is designed to facilitate the proper balancing of under/through beamsplitter 3D rigs on Vinten pan and tilt heads.

By offsetting the head's level position by a few degrees the balance mechanism produces a back-torque when the camera is level, this enables the centre of gravity of the payload (3D rig, lenses and cameras) to be forward of the tilt axis.

Key features and benefits:

- Balances rigs which cannot be mounted to a conventional head in a balanced position due to physical restrictions
- Allows more clearance for the under-slung camera therefore increases downward tilt available
- Quick release of rig, wedge assembly from head

Standard packages consist of:

V4091-0001 – 3D wedge for heavy duty Vinten Vector heads (950, 750, 75)

V4091-0002 - 3D wedge for medium duty Vinten Vector/Vision heads (430, 250)

Packages include 3D adapter, wedge plate (or EFP plate for medium weight), camera screws and T handle tool for camera screws.

Technical Specification

Height:	10 cm / 4"
Length:	20.5 cm / 8"
Width:	19 cm / 7.5"
Weight:	3.2 kg / 7.1 lbs
Capacity Range:	0 - 120 kg / 265 lbs
Colour:	Black
