

Vinten

μVRC Robotic Controller

Accessible Control Solution for Broadcast Applications

This cost-effective, modular version of Vinten's high-end HD-VRC software allows small studios to leverage the award-winning Vantage compact robotic head for unmatched flexibility in content creation and broadcast-quality movement and control.

Cost-Effective

Superior broadcast-quality, motion control at a price that suits your budget

Ergonomic Design

Complete with easy-to-read touchscreen and easy-to-use USB joystick panel

Easy Integration

Video switcher integration that easily connects with third-party switchers

Adaptable Solution*

Option to expand functionality based on specific needs and budget

Superior Functionality

Access to camera select, pre-set shots, essential shading*, playback, and more

Quick set up

Auto-discovery setting enables a quick setup of robotic devices

The perfect companion to Vantage, the μVRC can control multiple units for various shooting angles – all within budget.

*Subject to licensing of additional modules
