i-Series Interface, 750i, High Resolution

SKU: V4082-0101

PRODUCT DESCRIPTION

The i-Series Interface converts the proprietary encoder output from either the Vector 430i and Vector 750i to a digital quadrature output. This allows Vector 430i and 750i heads to be used within 3rd party camera tracking systems. i-Series Interfaces with an RS232 serial port fitted allows access to calibration and slide place tracking data by interfacing to the Intelligence Module fitted within each head using a simple Devicelink.i serial protocol.

TECHNICAL SPECIFICATIONS

Range	i-Series
Application	Sports, Live Studio
Compatible Camera Support	Vector 750i Pan & Tilt Head
IO	Devicelink.i Port Encoder output
Camera Tracking Output	Quadrature, Pan and Tilt Encoder Output

IN THE BOX

i-Series Interface
User Guide
