

1. Steering indicator for easy directional recognition
2. Triangular columns for maximum rigidity and minimal torsional twist
3. Small volume pneumatic system requires less nitrogen charge and gives the ability to be hand-pumped
4. Crab/steer changeover pedal for easy movement
5. Integral handles aids portability and manipulation
6. Built-in rubber bumper prevents damage to or by adjacent objects
7. Base jacking facility for ease of positioning of cable guard and pedestal parking
8. Column height marker strips for easy positioning
9. Base marker for repeatable positioning
10. Schrader valve for simple and effective charging
11. Quiet and non-marking wheels
12. Non-slip pads for foot control.

The Quattro is a unique and innovative four-stage pedestal with an extensive range of benefits for today's camera operator and is available in both studio, OB and small base versions.

- Perfect Balance provides fingertip control and reduces operator fatigue
- Quiet operation minimises set noise levels
- Excellent height range allows greater shot creativity
- Stylish ergonomic design offers easy access to controls
- Lower operating pressure allows a safer charging source to be used
